

California First Leasing Corporation

Semi-Annual Financial Report December 31, 2025

California First Leasing Corporation, (OTCID: CFNB, “CalFirstLease” or “Company”), headquartered in Newport Beach, California, is an internally managed non-diversified closed-end investment company under the Investment Company Act of 1940, as amended (the “1940 Act”). The Company invests in public equities and other investments to generate capital appreciation and maximize current income, while retaining the balance of its lease portfolio.

An investment in the Company’s common stock involves certain risks, including the risk of loss. The shares of common stock are not deposits or obligations of or guaranteed by any federal or other government agency. A registration statement dated July 20, 2022 (the “Registration Statement”) containing additional information about the Company has been filed with the Securities and Exchange Commission (the “SEC”). Investors should carefully consider the Company’s objectives and risks detailed in the Registration Statement and the Annual Report on Form N-CSR for the year ended June 30, 2025 filed on August 14, 2025, that may adversely affect the Company’s shareholders’ equity and stock price and may make an investment in the Company not appropriate for all investors.

Statements made in this report that are not strictly historical in nature constitute “forward-looking statements.” Forward-looking statements involve management judgment and assumptions, risks and uncertainties and include, but are not limited to, beliefs regarding investments in equity securities, swings in stock prices and the potential for significant volatility in reported net earnings and net asset value, the impact of external events on business activities and portfolios, estimates of expected tax rates applicable to future periods, impact of changes in interest rates and equity and fixed income markets. Such forward-looking statements involve known and unknown risks and uncertainties and factors that could cause actual results to differ materially, including political, economic, market, regulatory and other risks. Consequently, if management assumptions prove to be incorrect or such risks or uncertainties materialize, the Company’s actual results could differ materially from the results forecast in the forward-looking statements. All forward-looking statements are qualified in their entirety by this cautionary statement, and the Company undertakes no obligation to revise or update this information to reflect events or circumstances arising after the date hereof (February 5, 2026).

The chart below illustrates the value of \$10,000 invested in the Company's stock in comparison to the performance of the S&P 500(TR)[®] ("S&P 500"), an unmanaged index that covers 500 leading companies that approximate 80% of the available market capitalization. Results for the Company based on net asset value are an after-tax amount. The S&P index is an unmanaged benchmark that assumes reinvestment of all distributions and includes capital gains and distributions in the calculation but does not include a deduction for expenses or taxes. It is not possible to invest directly in an index. Performance data shown represents past performance and there is no guarantee of future results.

Performance Review

The Company focuses on investing in fair or undervalued stocks of public companies that we expect to deliver sustained earnings and cash flow growth that can be reinvested to continue substantial growth or be returned to shareholders via share repurchases or dividends.

Average Total Return through December 31, 2025

	<u>Six Months</u>	<u>1 Year</u>	<u>3 Year</u>
CFNB Equity Securities	20.2%	27.3%	22.7%
S&P (TR) Index	11.0%	18.0%	23.0%

During the six months ending December 31, 2025, stocks continued their upward trajectory since late spring, buoyed by strong corporate earnings, capital spending on artificial intelligence, and economic momentum sustained by three Federal Reserve interest-rate cuts. The S&P 500 advance of 11.0% for the six months put it near all-time highs, but its total return was below the NASDAQ Composite and Russell 2000 as the market broadened beyond mega-cap technology stocks into smaller cap and value stock sectors.

The Company's equity portfolio return of 20.2% for the first six months beat the S&P 500 return of 11.0% largely due to the accelerated valuation of semiconductor stocks that are a significant part of the Company's portfolio and accounted for over 50% of the unrealized appreciation during the period. For the six months ended December 31, 2025, the top contributor to performance was Alphabet followed closely by Micron Technology, with Applied Materials, Advanced Micro Devices and Goldman Sachs rounding out the top 5. On a percentage basis, the top performing stocks for the first six months of fiscal 2026 also included Comfort Systems USA and Digital Ocean Holdings.

The largest detractors to the six-month performance came from the pullback in crypto currencies that impacted the new ETF investments, and Meta and Netflix which had enjoyed large gains in fiscal 2025.

Over half of the Company's equity portfolio is invested in U.S. large capitalization equities and the Company generally retains measurable funds in short-term liquid investments in order to take advantage of investment opportunities as they arise. The Company does not specialize in any specific industry but may hold large positions in certain sectors that it believes offer the opportunity for long-term returns.

The equity portfolio at December 31, 2025 included common stock holdings in 42 public companies and three exchange-traded funds (ETF), all with readily available stock prices, compared to 43 public companies and one ETF at June 30, 2025. Two of the exchange-traded funds are targeted investments in Bitcoin and Ethereum, respectively. The top 5 equity holdings at December 31, 2025 make up 39% of the portfolio, up from 34% at June 30, 2025. Semiconductor related stocks at December 31, 2025 accounted for 31% of the portfolio, up from 23% a year earlier and from 26% at June 30, 2025.

The distribution of the Company's equity securities and gains or losses across segments at December 31, 2025 is summarized below, and compared to the distribution at June 30, 2025:

(in thousands)	Cost Basis	Unrealized		Fair Value	Fair Value at June 30, 2025
		Gains	(Losses)		
<u>December 31, 2025</u>

During the first six months of fiscal 2025, the Company invested \$23.7 million in equity securities, including \$17.0 million in 4 new positions and the balance in 8 existing holdings. The Company also sold 2 full positions and part of another for \$5.7 million during the period, realizing a net loss of \$1.4 million.

Lease Operations, Expenses and Taxes

Only one new lease for less than \$500,000 was booked and retained during the first six months of fiscal 2026, with the lease and loan portfolio declining to \$4.7 million, 1.4% of total assets, while total lease and loan income declined 88% to less than 1% of operating income.

The Company's operating expenses for the six months ended December 31, 2025 decreased by 25.8% to \$1.01 million from \$1.44 million the year before. The decline was due to lower performance bonus compensation as compared to prior year.

The Company's effective income tax rate varies between periods due to changes in the mix of pre-tax earnings, the benefit the Company receives from the dividends received exclusion, and the magnitude of gains or losses from equity securities included in earnings. For the first six months ending December 31, 2025, the tax provision of \$14.0 million represented an effective rate of 27.6%, up from 24.2% for the first six months of fiscal 2025, as dividends were a smaller proportion of reported earnings.

**NOTES TO FINANCIAL STATEMENTS****Note 1 – Basis of Presentation**

The accompanying unaudited financial statements of California First Leasing Corporation, (“CFNB” or the “Company”), have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and do not include all of the information and footnotes required for complete financial statements. These financial statements should be read in conjunction with the financial statements and notes thereto included in the Annual report on Form N-CSR for the year ended June 30, 2025.

In the opinion of management, the unaudited financial statements contain all adjustments, consisting only of normal recurring adjustments, necessary for a fair statement of investments as of December 31, 2025 and the related statements of operations, stockholders’ equity and cash flows for the periods presented. The results of operations for the six-month periods ended December 31, 2025 are not necessarily indicative of the results of operations to be expected for the entire fiscal year ending June 30, 2026. Certain reclassifications have been made to the fiscal 2025 financial statements to conform to the presentation of the fiscal 2026 financial statements.

Note 2 –Fair Value Measurement:

ASC Topic 820: “Fair Value Measurements and Disclosures” defines fair value as the price that would be received in an orderly transaction between market participants in the principal or most advantageous market. ASC Topic 820 establishes a three-tiered value hierarchy that prioritizes inputs that are observable in the market and requires the maximum use of observable inputs and minimum use of unobservable inputs. The three levels of inputs are defined as follows:

- Level 1 - Based upon unadjusted quoted prices for identical instruments traded in active markets;
- Level 2 - Based upon significant observable inputs, for example quoted prices for similar instruments in active markets, or quoted prices for identical instruments in markets that are not active;
- Level 3 - Valuation is generated using inputs not observable in the market and based on the Company’s own judgment. Level 3 valuation techniques could include the use of discounted cash flow models and similar techniques that rely on assumptions that market participants would use in pricing the asset or liability.

ASC 820 applies whenever other accounting pronouncements require presentation of fair value measurements but does not change existing guidance as to whether or not an instrument is carried at fair value.

The following table summarizes the Company’s assets carried at fair value as of December 31, 2025:

Description of Assets	Total Fair Value	Quoted Price in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
As of December 31, 2025				
Equity securities	\$ 307,946,265	\$ 307,946,265	\$ -	\$ -
Money-market accounts	17,507,66	17,507,664	-	-
	<u>\$ 325,453,929</u>	<u>\$ 325,453,929</u>	<u>\$ -</u>	<u>\$ -</u>

The net investment in leases in Note 4 of \$3.2 million approximates fair value. Leases consist of aggregate lease payments receivable, net of unearned income, with unearned income amortized on an internal rate of return method into income to achieve a level yield over the lease term, the “*implicit rate*”. As long as the current market rate is below the *implicit rate*, there is no fair value adjustment to the carrying value of Leases.

The Company’s one loan is not carried at fair value, but in accordance with the fair value disclosure requirements of ASC 825-50, the estimated fair value of the loan as of December 31, 2025 is based on discounted cash flow analysis using interest rates currently offered for loans with similar terms to borrowers of similar credit quality, and would be classified as Level 3 in the fair value hierarchy. Loan fair value has been adjusted for credit risk.

	December 31, 2025	
	Carrying Amount	Estimated Fair Value
Commercial real estate loan	\$ 1,319,65	\$ 1,263,154

Fair value estimates are based on relevant market information, however, they are subjective in nature, involve uncertainties and cannot be determined with precision. Different assumptions could significantly affect the estimated values.

**Note 3 – Investment Transactions and Compensation:**

For the six months ending December 31, 2025, purchases and sales of investments, excluding short-term investments, were \$23,689,775 and \$5,672,839, respectively.

The aggregate remuneration paid to all officers and directors during the six months ended December 31, 2025 was \$585,177 and \$54,000, respectively.

Note 4 – Leases and Loan:

The Company's net investment in leases and loan consists of the following:

	December 31, 2025
Minimum lease payments receivable	\$ 3,749,669
Estimated residual value	65,517
Commercial real estate loan	1,439,551
Less unearned income	<u>(418,111)</u>
	4,836,626
Less allowance for credit losses	<u>(100,000)</u>
Net investment in leases and loan	<u>\$ 4,736,627</u>

The minimum lease payments receivable and estimated residual value are discounted using the internal rate of return ("implicit rate") related to each specific lease. The weighted average maturity of lease payments at December 31, 2025 is 16 months, and the weighted average yield is 6.7%. There were no past due credits at December 31, 2025 and no increase in non-performing assets during the period.
